Wilkesbarre, Pa., July 27.-The beginning of the eleventh week of the anthracite miners' strike finds apparently no change in the situation, although the rumor has been revived that an effort will be made some day this week upon the part of one of the large companies to start up one of its collieries.

The companies have a sufficient number of coal and iron policemen enlisted now to prevent trouble should it arise, and all that would be necessary to get a mine in operation would be a sufficient number of miners and laborers to biast the coal and load it on the cars.

No doubt plenty of ordinary laborers could be secured, but it is a question whether the regulate number of miners could be persuaded to go into the workings. At strike bendquariers the belief is as strong as ever that the operators cannot resume and that it is idle talk to even suggest such a thing. President Mitchell simply says that the

situation is about the same and that the strikers are as firm as ever. A great deal of telegraphing passed to-day between Wilkesbarre, Indianapolis and the headquarters of the United Mine Workers in West Virginia, the nature of which

iz. Mirchell would not make public.
Three hundred delegates, representing the 18:900 Polish and Lichusnian residents of the Wyoming Valley met in convention here to-day, and after industing the strike uppointed a committee of ten to visit New York, Philadelphia, Pittsburg, Buffalo and other large cities and solicit aid from the Polish and Lithmanian people for their countrymen now on sarike in the anthra

CHOLERA UNCHECKED IN THE PHILIPPIN IN THE PHILIPPINES

In Some Villages One-Tenth of the Entire Population Has Died of the Plague.

REPUBLIC SPECIAL. Washington, July 27.-Latest reports recived by officials of the Marine Hospital Service from Doctor J. C. Perry, chief quarantine officer for the Philippines, show plainly that little progress has been made against the ravages of cholera, either in the city of Manila or in the Provinces.

He reports the situation unchanged in Manila, while statistics from the village: show that the disease is still unchecked. In some of the villages, he says, one-tenth of the entire population have died from cholera. The disease is spreading among the soldiers in Laguna and Batangas

The total number of cases outside of the city of Manila, reported from March 20 to May 31, is 4,410, while the total deaths reached 3,102, showing that very nearly twothirds of the cases were fatal.

The report for the city of Manlia from

May 25 to June 7, inclusive, shows a startling number of fatalities, larger in proortion even than in the Provinces for the same period. During these two weeks, there were reported 132 cases and 115 deaths. In the provincial towns, for the same eriod, there were reported 1,108 cases and

In Manha, during these two weeks, four Americans were attacked by the disease, but no fatalities were reported. Officials of the Marine riospital Service in Wastington beginning. Washington have inthe hope that there will be any diminution of the epidemic until the rainy season sets in in carnest, the middle or last of next month. They state that every precaution known to science has been taken to prevent the importation of the discuss by army transports and merchant vessels and so far they have been successful.

ASSERT THE ARMY IS BADLY DEMORALIZED

Anti-Imperialists Say Evidence of Numerous Crimes Has Been Concealed.

OPEN LETTER TO PRESIDENT.

Investigation of Specific Charges Denied Because of Official "Tender Regard for the Honor of the Army."

Lake George, N. Y., July M.-A special ommittee of anti-imperialists, appointed at a meeting of persons interested in that movement last spring in New York, has prepared an open letter to President Roosevelt. Members of the committee are Charles Francis Adams, Carl Schurz, Edwin Burritt Smith, Moorfield Storey and Herbert Weish. In the course of the letter, which is called forth by the President's action in retiring General Jacob H. Smith for cruel orders.

the committee says: We desire to express the gratification afforded us by your "review," as Commander-in-Chief, of the findings of the court-martial in the case of General J. H. Smith. Taken in connection with the previous memorandum of April 15, that review will, in our opinion, do much toward the reestablishment of the national prestige and th estoration of the morale of the army. time, therefore it is of more than a national, it is distinctly of international, service; for, brought into new relations with remote, and, above all desirable that the United States should aim to elevate others to a higher standard, rather than itself sink to a lower.

national dependents, such as that recently waged by us in the East, it behooves all such officers to be "peculiarly careful in their bearing and onduct, so as to keep a mural check over any acts of an improper character by their subor-dinates." Indian warfare.

While thus, however, expressing our sense of

While thus, however, expressing our sense of obligation, we wish most respectfully to call your attention to certain conclusions which we have in the course of our inquiries found ourselves compelled to reach.

Our investigations have led us to conclude that the demoralization of the officers and soldiers of our army in the Philippines, including all branches of the service and all grades of rank, was far more general, as well as pronounced, than might be inferred from your review of the court-martial findings in the case of General court-martial findings in the case of General Smith. The essential facts charged in this case. Smith. The essential facts charged in this case, we believe we have reason to say, were rather notorious than exceptional. Demoralizing influences, very prejudicial to any high standard of military morals, were under the circumstances, inevitable. These were aggravated by the fortuitious course of events, the operations in China reacting directly on the Philippines; for compact with the foreign contingents and the observation of their methods of making war there naturally had a deteriorating influence on our own officers and men in not dissimilar operations elsewhere.

Army in State of Demoralization.

Meanwhile, it is always to be borne in min Meanwhile, it is always to be borne in mind that one side only of this paintyl story has been heard, and that side only in part.

The testimony of representative Filipinos has been iselously and systematically suppressed. Judicial and impartial examination on the spot has been denied, or prusounced impresticable. From the very nature of things, armies and army organisations are much the same everywhere and a recent foreign experience, still where, and a recent foreign experience, still very fresh in public memory, forcibly suggests what may be expected from military tribunals and investigations when the esprit de corps is enlisted, or "the honor of the army" is thought

what may be expected from hinitary tributars and investigations when the esprit de corps is enlisted, or "the honor of the army" is thought to be involved.

In the present case, occasionally and by arcident merely, have fragments of information come to our knowledge-broken glimpses only have been permitted to reach the public eye. Certain facts have been elicited in the proceedings before the Senate Philippine Committee, or through the imperfect reports of evidence given in the more notorious of the courts-martial proceedings; but these, though very suggestive, are far from complete, much less exhaustive.

To our minds they indicate unmistakably a condition of great and general demoralization. Of this, the findings of the courts-martial referred to afford conclusive evidence; as also de-

Generals and Their Threats.

Generals and Their Threats.

A General for instance, high in command permits himself to say: "I will burn everything that stands and kill everything that lives in Batangas to have pence." If nothing else, this is suggestive of another memorable utterance of the same nature—an interance with which the name of Warsaw is mournfully associated. As eighteen centuries ago, so now—"Solituding in, facility, pacem appellant." Another General, a degree only less high in grade, is gn record as declaring in language, not classic certainly, but, though less terms, equally forcible with that just quoted: "By the great horn spoon, I will make them want peace, and want it bodily." As the not unnatural result of minitary operations so inspired, an official report indicates that, out of a total population in a single district of 200,000, not less than 100,000 perished.

Is this "assimilation," we would ask, "benevolent" in character? In the case of Samar, and the now familiar order there to burn everything and kill "all over 10," the Secretary of War asserts that, owing "to the good sense and self-restraint of General Smith's subordinates and their regard for the laws of war " * his intemperate and unjustifiable instructions were not followed."

Fire and the sword there had full sway. * * We find ourselves, though with deep regret, compelled to take lasue with you on one important point. The facts in one of these cases, the most aggravated were early brought to the attention of
the chairman of the Senate Philippine Committee (Henry Cabot Lodge), and an investigation

comes before him. Some of his subordinates do, and many of his most distinguished official callers do likewise. This mysterious business is sometimes carried to an amusing, if not ludicrous, degree.

A short time ago a distinguished Federal official from the South, who does not care to have it made known that he occasionally dabbles in politics, came to Washington to confer with the President about certain Federal appointments in his State.
